Rheia is an advanced HVAC (Heating, Ventilation, and Air Conditioning) system designed for highly efficient air distribution in residential homes. It uses a compact, flexible, and easily installable **duct system** that helps improve energy efficiency, air quality, and overall home comfort.

Rheia air distribution systems are designed to improve comfort and energy efficiency compared to traditional HVAC systems. With BOA Builders, our pride lies in our commitment to pioneering construction practices grounded in building science. In the valley, we stand as trailblazers, being the foremost to adopt the innovative RHEIA duct system.

Enhanced Air Quality

With better-sealed ducts, Rheia reduces dust, allergens, and pollutants more effectively than traditional HVAC systems for cleaner, healthier air.

Improved Airflow

Optimized airflow ensures more consistent temperatures throughout the home, enhancing comfort.

Energy Efficient

Rheia minimizes air leaks, reducing energy loss and lowering utility bills compared to traditional systems.
